AMENDMENTS TO THE CLAIMS

Please amend the claims as they currently stand so that they are in accord with the following listing of the claims:

1. (Currently Amended) A portable ~~computing, communication and entertainment processing~~ device comprising:

a detachable handset unit sized for handheld grasping and including a central processor and a plurality of first circuits, said processor controlling the operation of said first circuits;

a portable docking display unit dimensioned to dock with said detachable handset unit, and said portable docking display unit including a first display and a plurality of second circuits, said plurality of second circuits not including a central processor, and wherein said central processor controls the operation of at least one of said second circuits and said first display when said detachable handset unit is docked with said docking display unit.

2. (Currently Amended) A device, as set forth in claim 1, wherein said central processor generates control signals, and said portable docking display unit includes a platform dimensioned to accept docking of the detachable handset unit ~~and a first electrical connector for receiving said control signals~~, with the control signals coupled to the docking display when docked with the detachable handset.

3. (Currently Amended) A device, as set forth in claim 2, wherein said control signals are coupled by means of a first electrical connector provided on the detachable handset unit and said portable docking display unit further includes a second electrical connector for removably engaging said first electrical connector when said detachable handset unit and said portable docking display unit are docked.

4. (Currently Amended) A device, as set forth in claim ~~[[3]]~~ 1, wherein said detachable handset unit further includes at least one of a memory, a wireless communication circuit, an audio interface circuit, a first microphone, a first speaker, and a power supply.

5. (Currently Amended) A device, as set forth in claim ~~[[4]]~~ 1, wherein said docking display unit further includes a ~~[[wired]]~~ communication circuit ~~and a communication jack~~.
6. (Currently Amended) A device, as set forth in claim ~~[[5]]~~ 1, wherein detachable handset includes a first speaker and microphone and said docking display unit further includes a second speaker and a second microphone.
7. (Currently Amended) A device, as set forth in claim ~~[[6]]~~ 1, wherein said docking display unit includes a ~~power jack~~ display which is larger than a display associated with the detachable handset.
8. (Currently Amended) A device, as set forth in claim ~~[[7]]~~ 1, wherein said docking display unit includes a first pen-input panel.
9. (Currently Amended) A device, as set forth in claim ~~[[8]]~~ 1, wherein said docking display unit is mounted in a vehicle.
10. (Previously Presented) A device, as set forth in claim 1, wherein said detachable handset unit includes a second display.
11. (Currently Amended) A device, as set forth in claim ~~[[10]]~~ 8, wherein said detachable handset unit includes a second pen-input panel.
12. (Currently Amended) A device, as set forth in claim ~~[[11]]~~ 1, wherein said detachable handset unit includes a first keyboard and said docking display unit includes a second keyboard.
13. (Currently Amended) A device, as set forth in claim ~~[[12]]~~ 1, wherein said detachable handset unit includes a ~~jack to connection~~ jack to connection ~~[[to]]~~ for an external headphone.

14. (Cancelled)

15. (Currently Amended) A device, as set forth in claim [[14]] 1, wherein said detachable handset unit includes at least one of an optical transmitter and an optical transceiver.

16. (Currently Amended) A device, as set forth in claim [[15]] 1, wherein said detachable handset unit includes a Global Positioning System receiver.

17. (Currently Amended) A communication and processing device comprising,
a portable handset for handheld grasping ~~and manipulation of at least one input device provided thereon, the input device coupled to~~ having a central processor associated with the handset, and having a first display associated therewith,
a docking display, to which the handset is selectively docked, wherein the docking display has ~~a second~~ an auxiliary display which is ~~larger than the first display, being controlled by the processor controlled by the central processor of the portable handset and operational only when docked therewith.~~

18. (Previously Presented) The device of claim 17, wherein the docking display is configured as a clamshell unit with first and second portions, having an auxiliary display in the first portion and an auxiliary keyboard in the second portion.

19. (Previously Presented) The device of claim 18, wherein the auxiliary display and auxiliary keyboard face one another when the clam shell unit is in the closed position.

20. (Currently Amended) The device of claim 17, wherein the handset comprises ~~a central processor and~~ at least one interface selected from the group consisting of a video interface, a keyboard interface, a communication device, a pen-input interface, an audio interface or combinations thereof.

21. (Currently Amended) The device of claim 20, wherein the docking display includes at least ~~at least~~ one interface selected from the group consisting of a video interface, a keyboard interface, a communication device, a pen-input interface, an audio interface or combinations thereof, wherein upon docking of the handset, the central processor of the handset controls the at least one interface of the docking display.

22. (Currently Amended) The device of claim 17, wherein the handset comprises ~~a central processor and~~ at least ~~[[one]]~~ two interfaces selected from the group consisting of a video interface, a keyboard interface, a communication device, a pen-input interface, and interface signals from the at least ~~[[one]]~~ two interfaces are multiplexed.

23. (Currently Amended) The device of claim 17, wherein the docking display includes a recessed portion in which the handset is docked, wherein the handset when docked, is positioned on the back of one of the portions of the clam shell unit.

24. (Previously Presented) The device of claim 17, wherein the docking display is mounted within a vehicle for selective docking of the handset thereto.

25. (New) A portable processing device comprising:
a detachable handset unit sized for handheld grasping and including a central processor and a plurality of first circuits, said central processor controlling the operation of said first circuits;

a portable docking display unit dimensioned to dock with said detachable handset unit, and said portable docking display unit including a first display and a plurality of second circuits, at least one of the plurality of second circuits being operated solely by the central processor of the detachable handset, and wherein said central processor controls the operation of said first display when said detachable handset unit is docked with said docking display unit.
